Sundhetscertifikat för export/ phytosanitary certificate for export

Ett internationellt överenskommet dokument

Syfte:

att intyga att mottagarlandets lagstadgade krav på frihet från växtskadegörare är uppfyllt och samtidigt underlätta internationell handel

181 regeringar står bakom – parter som anslutit sig till den Internationella växtskyddskonventionen, IPPC

Jordbruksverket är Sveriges växtskyddsmyndighet,
National Plant Protection Organisation, NPPO

Handlar om att skapa förtroende mellan länder genom att tillämpa tydliga regler i internationell handel med växter och växtprodukter

Ta till vara landets rätt att skydda sig mot allvarliga växtskadegörare, (karantänsskadegörare)

Motverka omotiverade handelshinder

Gemensamt beslutade Internationella standards, ISPMs, är grundbultar i systemet...

International Standards for Phytosanitary Measures

ISPM 7 - EXPORT CERTIFICATION SYSTEM

describes the components of a national system for the issuance of phytosanitary certificates.

ISPM 12 - PHYTOSANITARY CERTIFICATES

provides the requirements and guidelines for the preparation and issuance of phytosanitary certificates

The WTO Agreement on the Application of Sanitary and Phytosanitary Measures (SPS Agreement)

Varje land har rätt sätta upp importrestriktioner i syfte att skydda sitt territorium från skada på

- människors hälsa
- djurs hälsa
- växters sundhet

så länge det görs enligt internationellt överenskomna riktlinjer!

The WTO Agreement on the Application of Sanitary and Phytosanitary Measures (SPS Agreement)

SPS Agreement Art. 3 (1):

“To harmonize sanitary and phytosanitary measures on as wide a basis as possible, Members shall base their sanitary or phytosanitary measures on international standards, guidelines or recommendations, where they exist,”

Definitions, Annex A, point (3) c:

International standards, guidelines and recommendations:

“for plant health, the international standards, guidelines and recommendations developed under the auspices of the Secretariat of the International Plant Protection Convention ...”

ISPM 12, PHYTOSANITARY CERTIFICATES

Name of produce and quantity declared:

This section should include the name of the plant, plant product or other regulated article, unit and the quantity as accurately as possible **to enable the NPPO of the importing country to verify the contents of the consignment.**

Number and description of packages:

The number of packages and their description should be included. Sufficient detail should be included in this section **to enable the NPPO of the importing country to link the phytosanitary certificate for export with the corresponding consignment.**

ISPM 12, PHYTOSANITARY CERTIFICATES

Sundhetscertifikat ska utfärdas innan sändningen lämnar landet.

Det får utfärdas senare under förutsättning att

- *“The phytosanitary security of the consignment has been assured,*
- *the NPPO of the exporting country has undertaken sampling, inspection and treatments necessary to satisfy phytosanitary import requirements before dispatch of the consignment.”*

Om dessa villkor inte är uppfyllda, ska sundhetscertifikat inte utfärdas.

Först export, sedan import ...

Jordbruksverket intygar genom sin exportkontroll både sundhet och innehåll i sändningen

Jordbruksverket måste känna till importlandets krav. HT/KD behandling är inte den självklara lösningen!

För godkänd import måste sundhetscertifikatet godkännas av importlandets växtskyddsmyndighet och/eller tullmyndighet

Ett eller flera dokument?

Phytosanitary certificate - world wide

Baserat på den Internationella
Växtskyddskonventionen finns ett enda
myndighetsdokument för internationell
handel med växter och växtprodukter!

Vid internationell handel med livsmedel
och djur finns det en mängd olika intyg
och dokument.

Risk för fusk och bedrägerier...

Inom 3-5 år:
